Workflow Consultant, Bluebeam Inc.

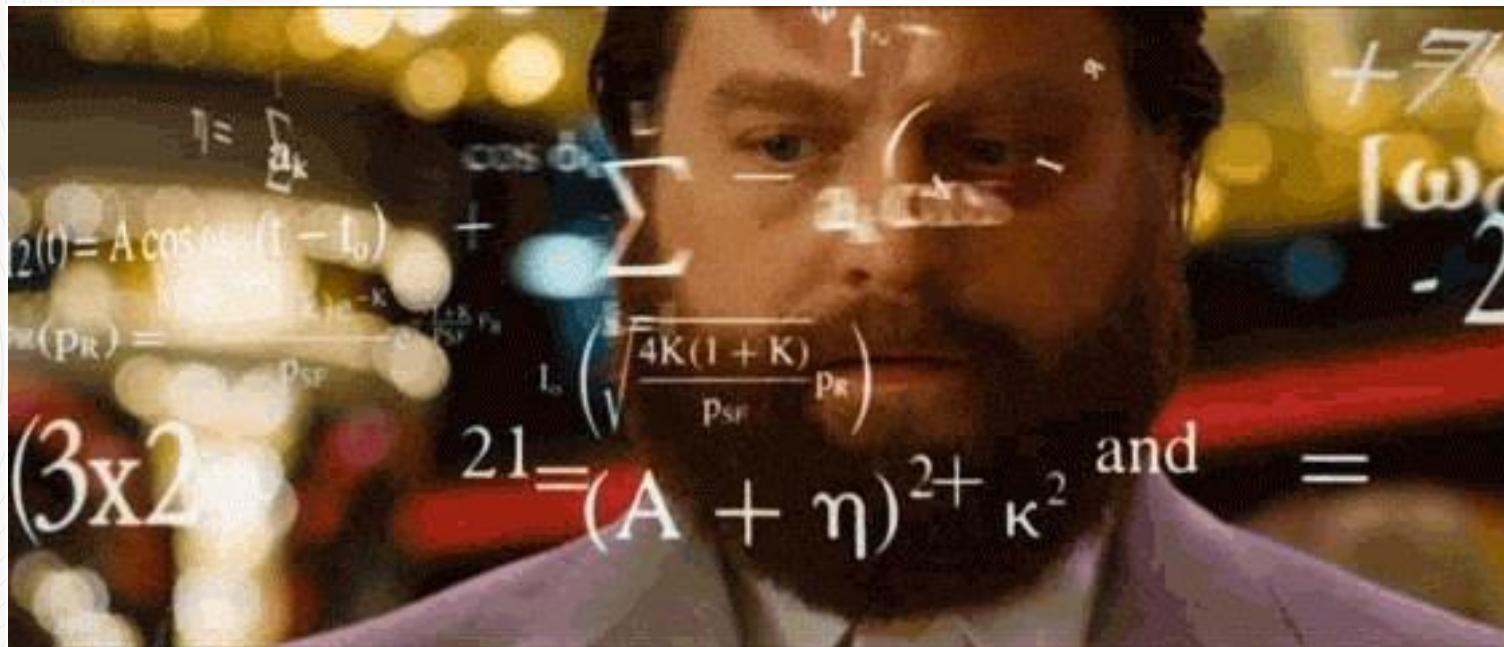

“ Save time during estimates by learning tips and tricks during digital quantity takeoff. From building libraries of tools to taking advantage of the many customizations available in your Markups List, there are tons of tips for shaving time and automating processes. Settle in for a quick-fire presentation on making your job easier for you and your project teams.

# LEARNING OBJECTIVES

By the end of this session, you will:

- Learn the advantages of managing your documents
- Understand the importance of standardizing tools and markups
- Explore some of the new features that aid in expediting the takeoff process (Toolset search, Multiply)
- Understand the importance of customizing your Markups list to capture the needed metadata.
- Know the advantages of using the legend to display pertinent information at first glance.

## Let's dive in...

**What features would you  
like to see improved or  
added to enhance takeoffs  
in the future?**

- ⓘ The Slido app must be installed on every computer you're presenting from
