

New IT Admin Tools in Bluebeam

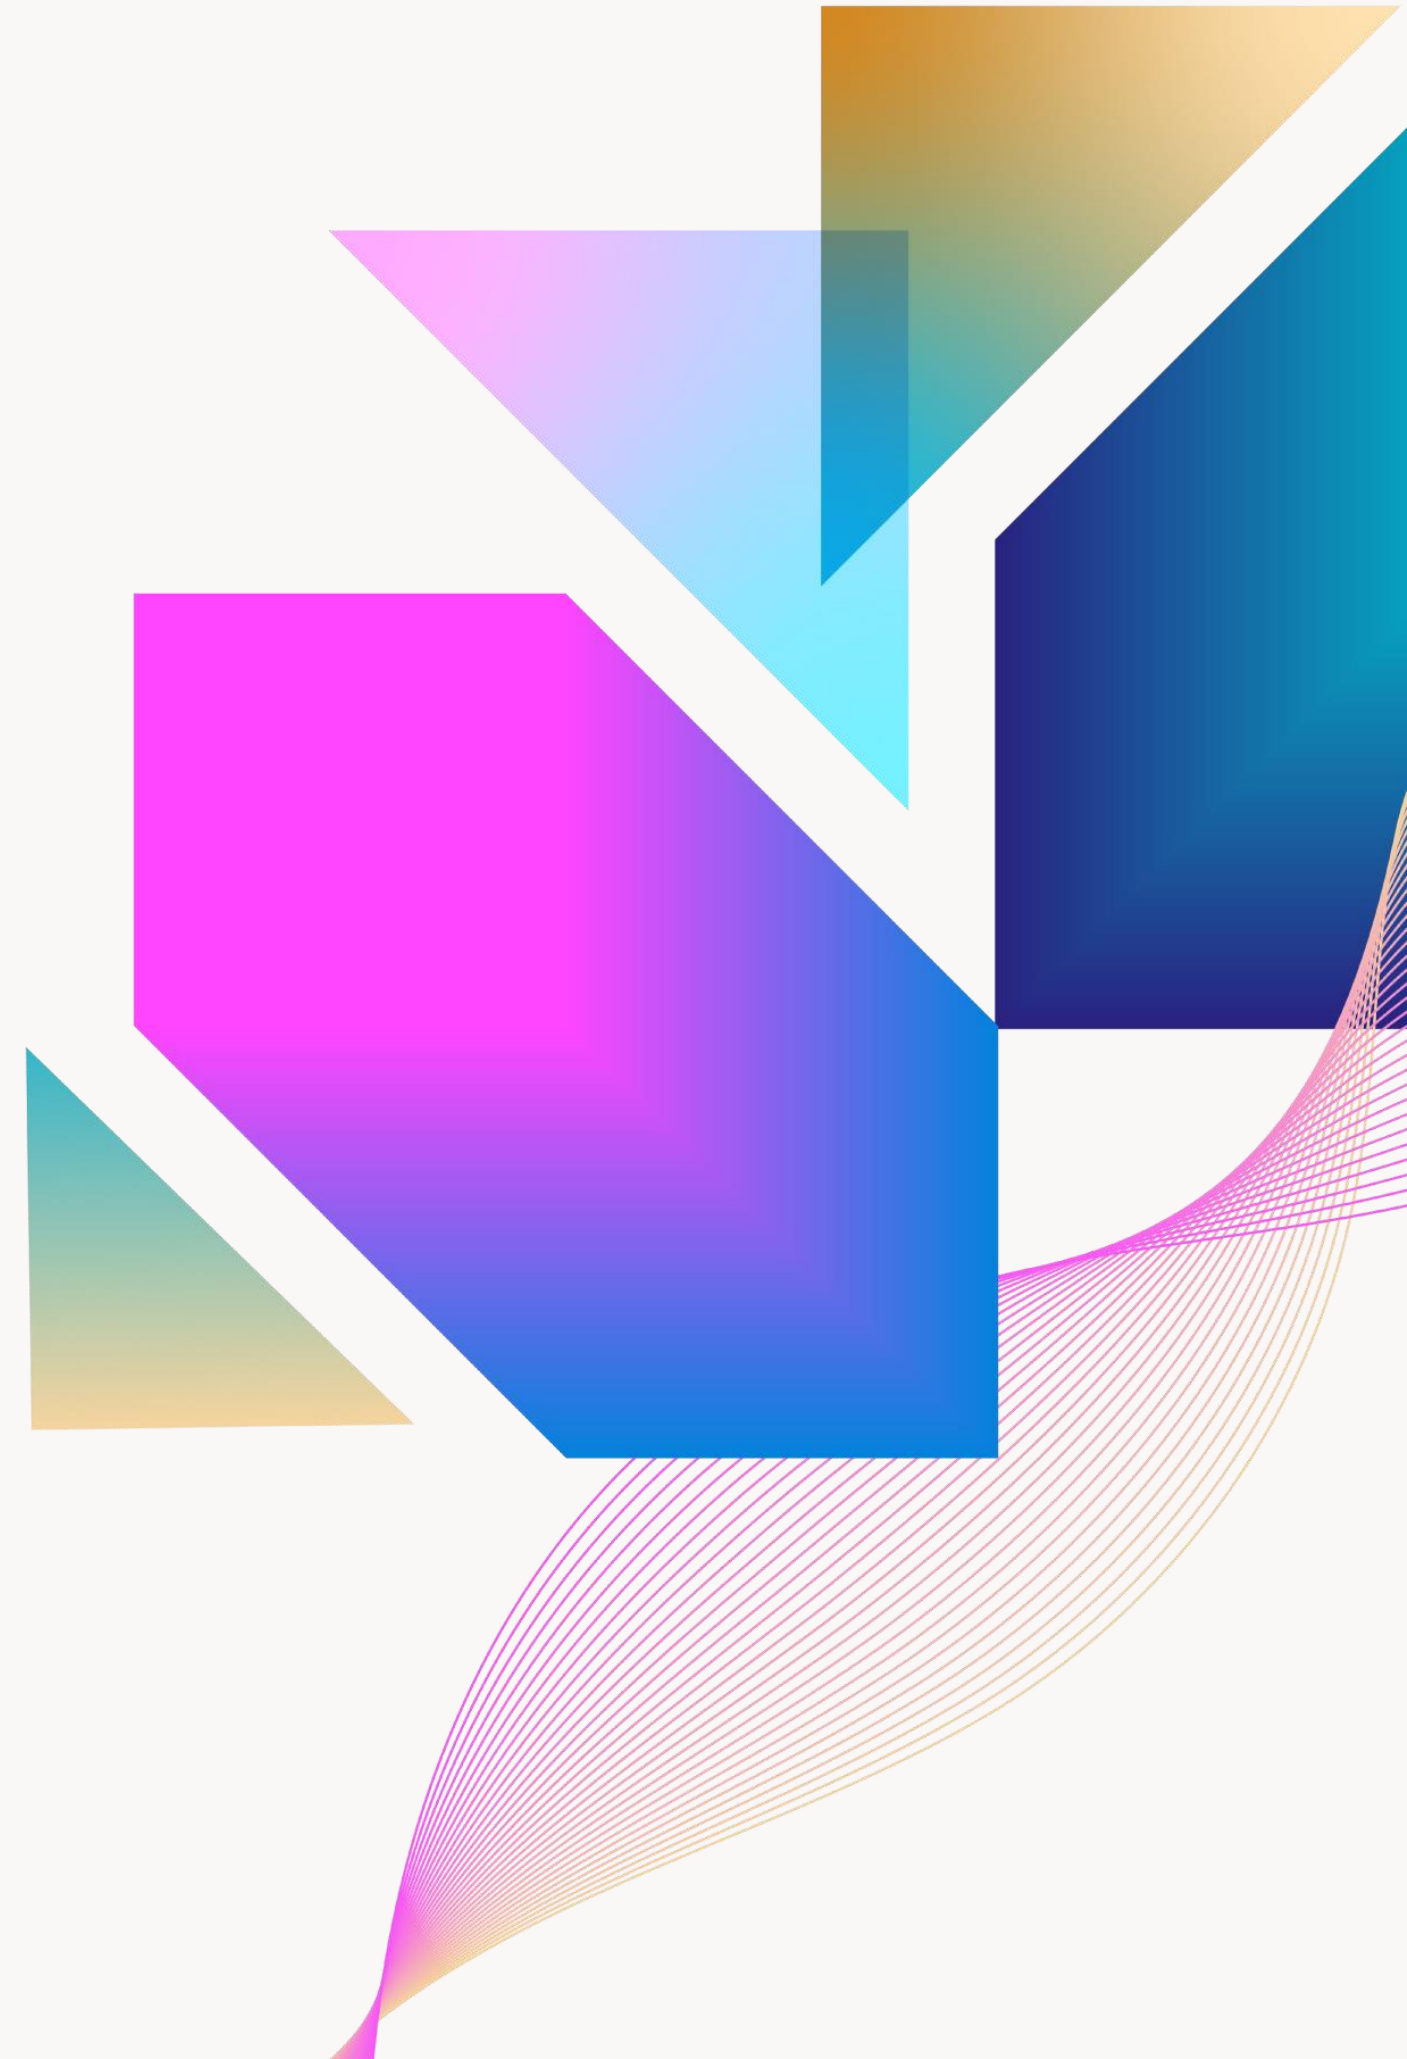

Unlock the full potential of Bluebeam for IT admins

Matt Mauer

Group Product Manager,
Bluebeam

David Vallejo

Director Product Management,
Bluebeam

Agenda

01 Current IT Admin Landscape

- Single Sign-on (SSO)
- Deployment Tools & VM Support
- Prime EOL & Integration Impacts
- Deployment Tools & VM Support

02 Org Admin Deep Dive

- Org Admin/Org Admin Pro Key Feature & Live Demo

03 Upcoming Enhancements & Concepts

- Audit Logs
- Billing & Purchasing

04 Open Discussion & Q&A

- What's missing?
- Questions

Current IT Admin Landscape

Where We Are Today

Single Sign-On (SSO)

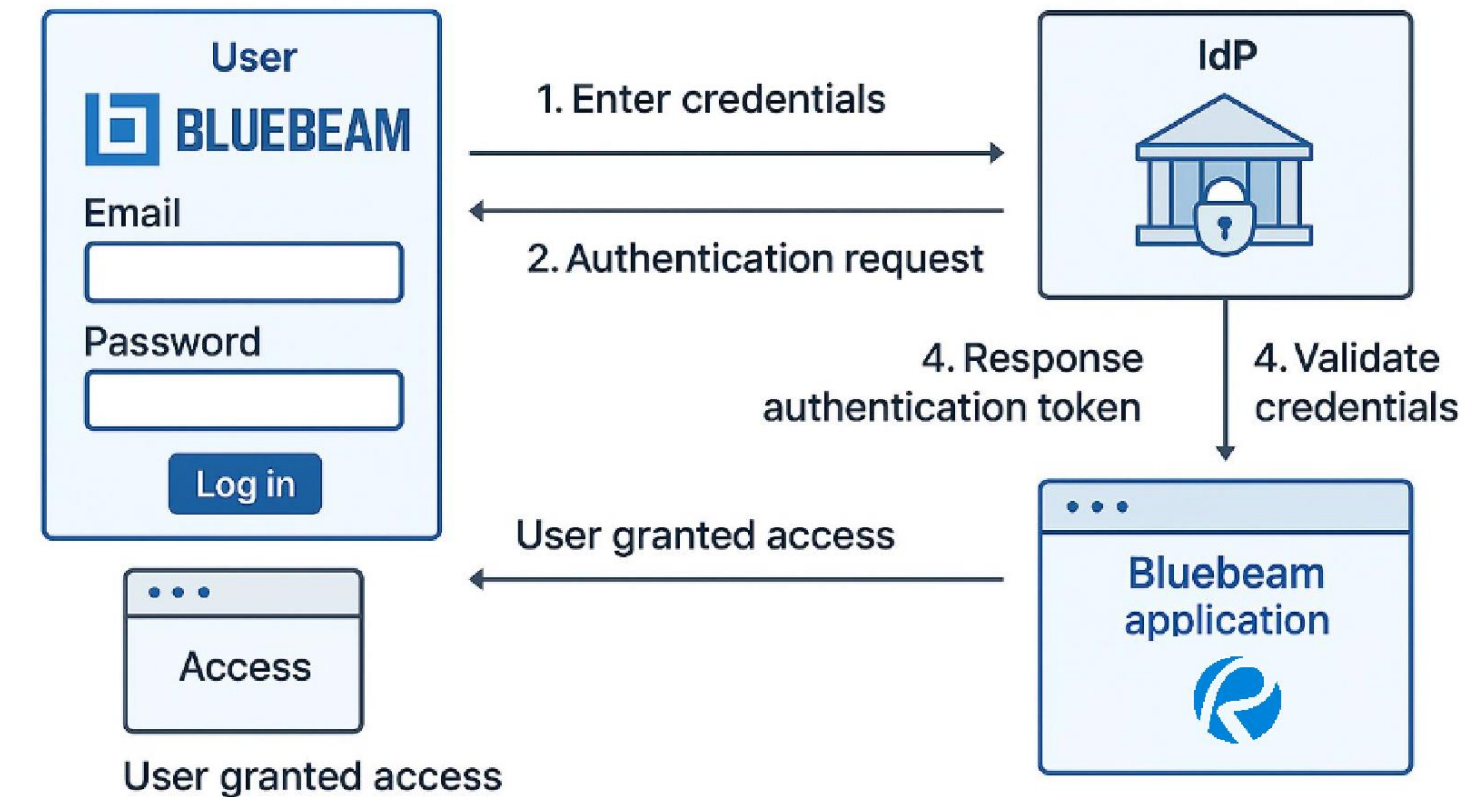

SSO Today

Current Landscape

- Organizations with 50+ seats
- Microsoft Entra ID & Okta Workforce Identity Cloud
- OpenID Connect (OIDC) protocol support
- Automated user management via SCIM provisioning
- IT Admin lead user reconciliation for data retention

Known Limitations

- Data reconciliation can be cumbersome
- Difficulty adding and removing domains
- Limitations around updating client secrets

SSO Interface for Bluebeam

Single Sign-On (SSO)

Future SSO Landscape

Upcoming Enhancements

- Alternative reconciliation options for Studio data
- Ability to bypass user reconciliation
- Easily add or remove domains without turning off SSO
- Update client secrets with ease

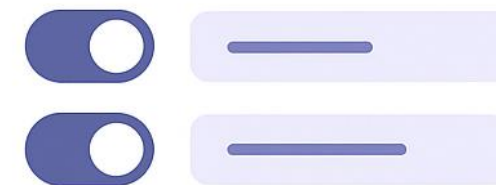

Future SSO Enhancements

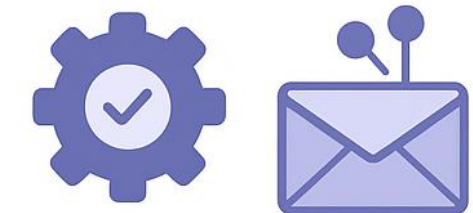

Streamlined Configuration

Simplified User Management

Flexible Domain Controls

Automated Client Secret Updates

Deployment Tools

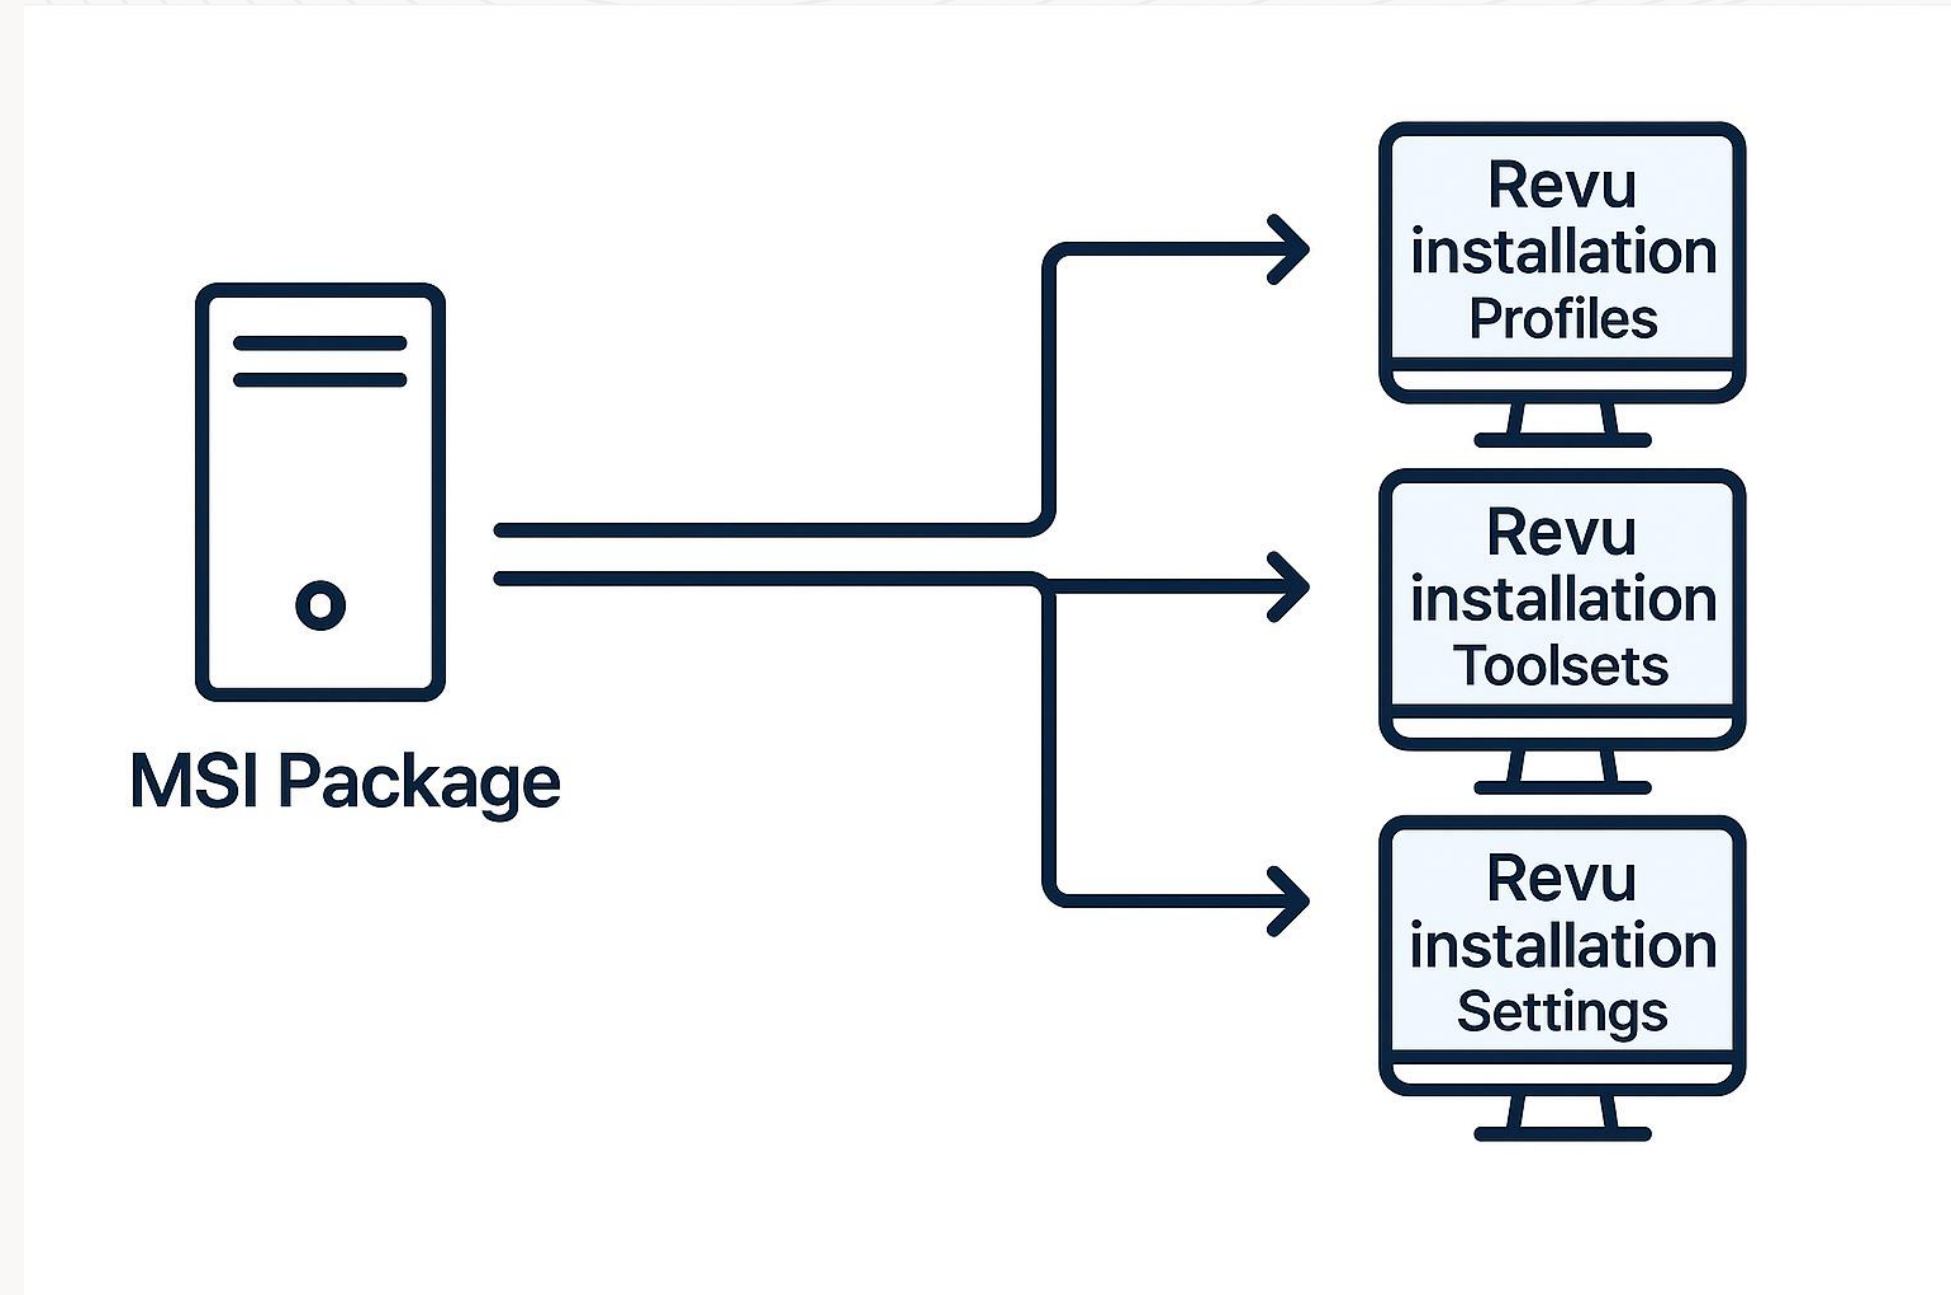

Streamline Revu Installations

MSI Deployment Package

- Silent deployment supported
- Pre-configure profiles and tool sets
- Includes Revu + OCR components
- Command line script support

Enterprise Compatibility

- MECM (Microsoft Configuration Manager)
- Microsoft Intune
- KACE
- Group Policy deployment

VM Supportability

How VMs work with Revu

Existing Functionality

- **Citrix Virtual Apps and Desktops** fully supported
- **Persistent and non-persistent** support via auto-logout scripts for session cleanup
- **VMware/RDS support:** While not officially supported, customers have been able to configure these successfully.

Prime EOL

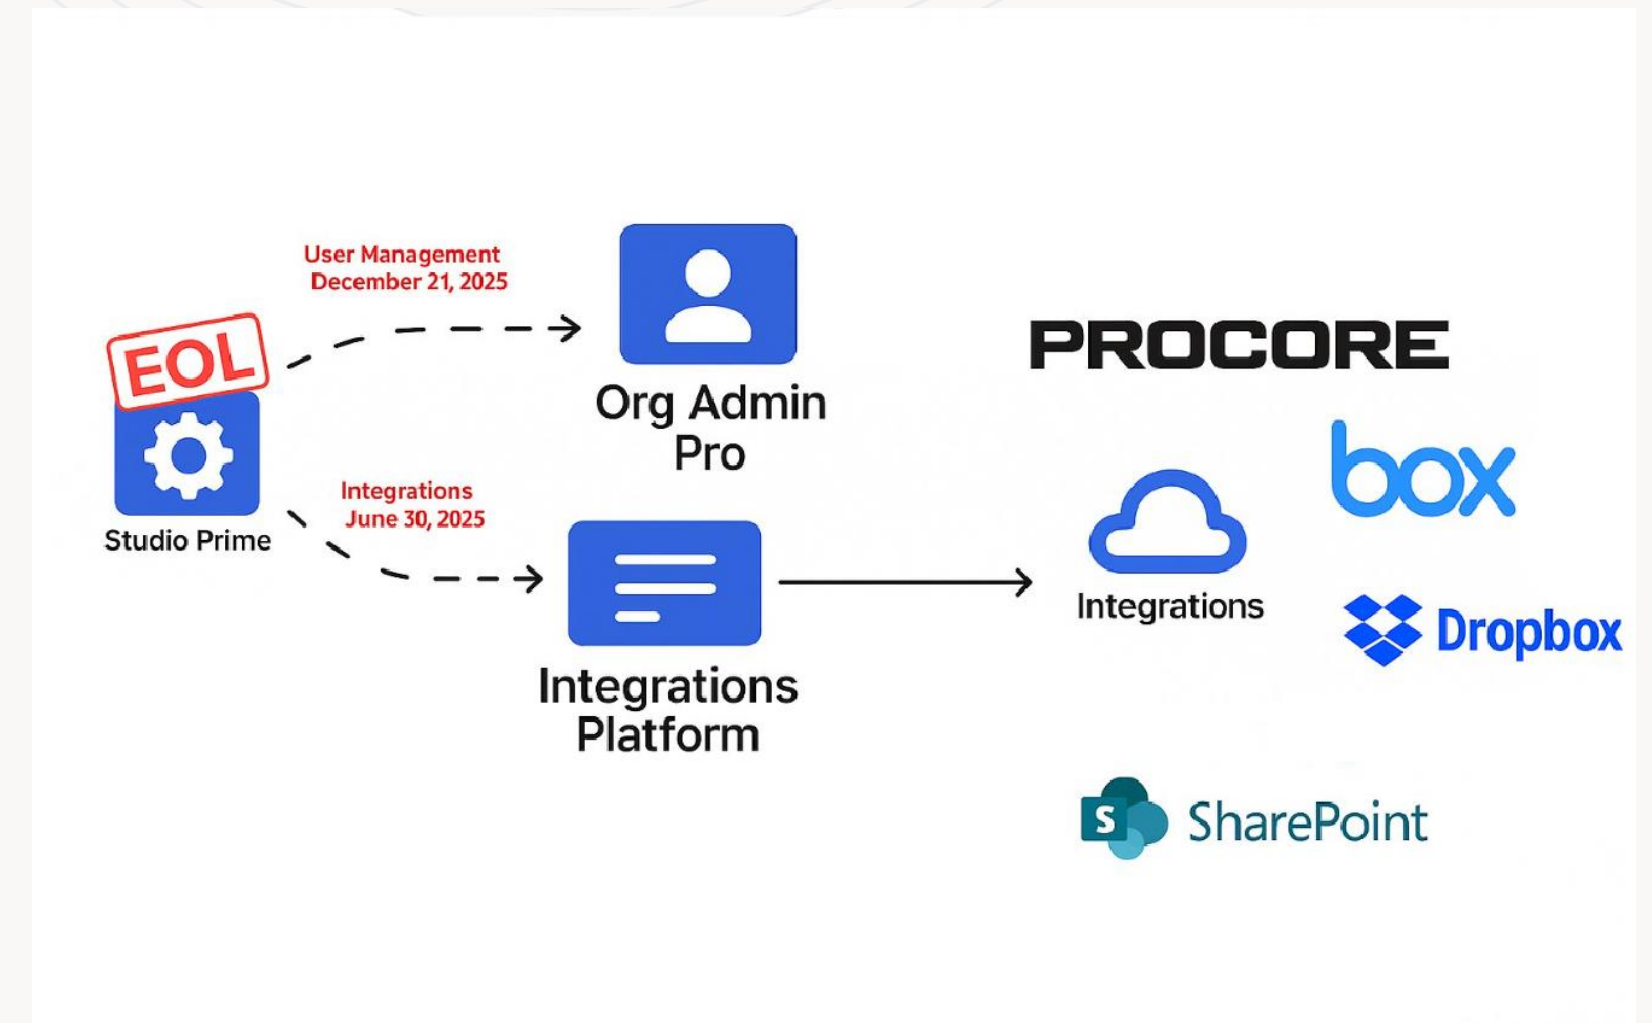

Impact on Integrations and Studio User Management

What Prime Originally Solved

- **Lack of administrative oversight** into Studio usage and collaboration
- **Integration capabilities** between Bluebeam and enterprise systems

The Evolution Timeline

- **2010:** Studio Sessions launched (real-time collaboration)
- **2012:** Studio Projects added (document management)
- **2015:** Studio Prime introduced (administrative control + API access)
- **2022:** Subscription model announced
- **June 2025:** Integrations exclusively on the New Integrations Platform launched (Prime-free connectivity)
- **Sept. 2025:** Org Admin Pro Launch

User Management

Org Admin & Org Admin Pro

Org Admin

Managing User Licenses

Org Admin features

- Individual license management
- Bulk license management
- Self-Serve SSO
- SCIM support for Microsoft and Okta
